CVS Labs and/or Cultures Required

In order to have a Chorionic Villi Sampling (CVS) procedure, we will need the following labs & cultures results faxed to our office before the date of your procedure:

- BLOOD TYPE
- RH FACTOR
- MCV
- ANTIBODY SCREEN
- GROUP B STREP: (Vaginal Culture) *Please note, we need notification if NO GBS is found.*
- CHLAMYDIA
- GONORRHEA

Cultures cannot be more than 6 weeks old as of the date of the procedure. If the Rh factor is negative, a new antibody screen must be performed within 30 days prior to the procedure.

Please fax results to: (310) 423-9940
